HEALTH

PRESERVING AMERICA'S LEADERSHIP IN LIFE SCIENCES IS ESSENTIAL

ABOUT WE WORK FOR HEALTH

We Work For Health works with innovators, manufacturers, investors, patients, employers, students, educators and all those who value the importance of U.S. leadership in medical innovation today - and for years to come.

As the bedrock of innovative jobs in the U.S. today, the life sciences sector supports more than **4.9 million American employees**. Advancing and protecting these jobs is critical for those employees, the economies they support and the patients they serve.

Most importantly, those working in and around the life sciences industry help develop new treatments and cures for patients across the country and the globe.

POLICY FRAMEWORK

Our aim is to empower life science innovation in the United States by advocating for policies that support a strong biotechnology ecosystem. WWFH supports establishing a national strategy to preserve America's leadership in the life sciences.

Key public policy goals include:

- 1. Incentivizing** and **Protecting** a Robust Research & Development Ecosystem in the United States
- 2. Reducing** Patient Access Barriers to Medicine
- 3. Protecting** and **Supporting** High-Quality Jobs in the United States
- 4. Retaining** America's Position as Leader in Healthcare and Medical Innovation

GET INVOLVED

Public-private collaboration is crucial to sustaining an environment that fuels medical innovation and creates lasting impacts for patient health, as well as local, state, and national economies. Working together, we can advance WWFH's mission and build a stronger, healthier, and more prosperous future. To learn more and get involved, visit
